technology: Speed Profile SBS, protected on the top waves of profiles with thin, fine HDPE
(6 µm) foil.**5. Type of application:**for waterproof insulations in wall constructions or on/under floors or ground slabs to prevent
liquid water under hydrostatic pressure, passing from the ground into the internal environment
or from one section of the structure to another.**6. Method of application**

torch applied with propane - butane burner.

7. Information for users:Conditions of application:

the sheet should be applied when the temperature does not fall below 0°C.

It should not be applied: on a wet surface, during rain or snow falls or during strong wind.

Conditions of usage:damp proofing for buildings made with the use **Icopal P Base 35 ww Speed Profile SBS** should
be done according to a technical project complying with binding building regulations and detailed
guidelines included in the manual issued by the producer.Storage:the rolls should be stored in rooms and should be protected against moisture and exposure to sunlight
or source of heat. The rolls should be stored on an even surface in upright position, in one layer.Transport:the rolls should be transported in covered trucks, in upright position in one layer, protected against
falling over and any other damage. Rolls should be placed in a way preventing their dislocation during
transport.
